

NORTH MORLEY NEWS

19 June 2018 | Term 2 Week 8

Welcome from the Principal

Welcome to week 8 of this term. It is great to see our Library work begin. Thank you so much to Rob Connolly, the site manager, who organised our new logs in the Nature Play area and the wood chips for Mr Kell's garden.

There are a few events taking place over the next two weeks. The winter sports program is winding up, and the senior students will be heading to a lightning carnival on Thursday June 28 with the other schools within our network.

Our Edu Dance concert is on next Wednesday at 2:15pm in the Arts Centre. Everyone is really looking forward to this event.

On Friday June 29 the school is closed as staff head to John Forrest SHS or Hampton SHS for Professional Learning with the other Morley network schools. We are continuing the journey on Visible Learning and Dr Hattie's research.

IPS – Independent Public School

On Monday, Jordan McGrath (School Council chair), Coby Francis (staff member representative on the School Council) and I completed day 2 of preparing for IPS. The surveys completed last week were our first task to prepare for day 2. The surveys were very positive, and it was great to get 45 community responses. Our task from the surveys is to present a narrative, or our story, to a panel. The narrative will answer 3 criteria to show we are ready for IPS status. The panel is made up of 3 IPS principals. Jordan and I will present the information in a 30 minute presentation.

Staff and the School Council have looked at the raw data and discussed our strengths and areas to improve on. It has been decided that the narrative will have a focus on communication. Telling the story of where we've come from, our present position and our future goals. As a result, we would like your input of further information to help us with this. At the Student Council assembly and at the Edu Dance concert there will be some people asking you what

you think we are doing well and what we can do better with communication. This will help with our story.
We will be presenting our Narrative on August 20th & 21st.

It is vital that plastic bags are banned immediately!

By Ayla Woolridge

I strongly believe that plastic bags should be banned at once, because: plastic bags are not sustainable, plastic bags are toxic to the environment and over 400 million plastic bags are being produced a year.

First of all, plastic bags are not sustainable. Plastic will only start degrading after 700 years and will only fully degrade in 1000 years. Of course, this means that all the plastic that has ever been produced will not fully degrade. Because of this, no plastic bags will even start degrading and be dumped in landfill. Imagine what the world would be like if we stopped using plastic bags!

In addition, plastic bags are toxic to the environment. Plastic bags are produced using petroleum, natural gas and other chemicals. Its production is toxic to the environment. Plastic that has blown over from landfill, goes into the ocean, where marine life lives. Many marine animals have died, due to eating plastic. In 2008, a sperm whale was found beached in California. It died, in due to 22 kilos of plastic

And finally, over 400 million plastic bags are produced a year. Over 150, 0000 plastic bags are used every second globally. That means over 150, 0000 plastic bags are being dumped in landfill, a huge amount of it blowing over to the ocean. Our beautiful oceans are being turned into a garbage dump. We need to stop and ban plastic bags, before the gets worse!

In conclusion, I hope you can finally see that plastic bags must be banned because: plastic bags aren't sustainable, they are toxic to the environment and over 400 million plastic bags are being produced a year. I challenge you to stop using plastic bags. It's O.K. if you need to remind yourself to bring a reusable bag. Just put a little note on your steering wheel, or your door.
