

July 24 2018 | Term 3 Week 2

Welcome from the Principal

Resilient kids know how to cope and have the skills that can help them handle problems and different situations. Here are a few tips to help you raise a resilient child.

Let your child make mistakes

By having to overcome normal challenges for their age and understanding that no one is perfect, your child will learn how to bounce back and be more resourceful. By over-protecting your child and doing things for them, you deny your child important opportunities for developing resilience.

Don't fight your child's battles

Sorting out conflicts with friends and peers are important skills for healthy social relationships.

Encourage your child to talk about things that are bothering them.

Learning to seek help when a problem can't be solved is an important lifelong skill. Let your child know that unhappy or difficult times are a normal part of life and don't usually last for long.

Encourage your child to re-phrase their unhelpful thinking

Teach your child to turn words such as - *I'm stupid* or *She hates me* into more helpful and optimistic thinking - *I made a mistake, everyone makes mistakes* or *She doesn't hate me, she just feels like playing with someone else today.*

Taking Responsibility

Encourage your child to take responsibility for the things they have or haven't done that may have contributed to an unhappy situation or setback. Also help your child to understand the role that 'bad luck' and the role that others may have played in this situation.

You have an important role

Try to model these skills to your child. Talk your problems through with others and review different solutions.

- Use optimistic thinking and say things such as – *Things will get better soon.*
- Talk about how you may have managed strong emotions in a calm way.
- Talk about your goals and how you hope to achieve them.
- Show appreciation to others for their friendship.
